Toxicological Data on Ingredients

Not applicable.

**Section 3. Hazards Identification**

**Potential Acute Health Effects**

Slightly hazardous in case of skin contact (irritant), of eye contact (irritant), of ingestion, of inhalation.

**Potential Chronic Health Effects**

Carcinogenic Effects: Not available.
MUTAGENIC EFFECTS: Not available.
TERATOGENIC EFFECTS: Not available.
DEVELOPMENTAL TOXICITY: Not available.
Repeated or prolonged exposure is not known to aggravate medical condition.

### Section 7. Handling and Storage

**Precautions**
Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not breathe dust.

**Storage**
Keep container tightly closed. Keep container in a cool, well-ventilated area.

### Section 8. Exposure Controls/Personal Protection

**Engineering Controls**
Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

**Personal Protection**
Safety glasses. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

**Personal Protection in Case of a Large Spill**
Splash goggles. Full suit. Dust respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Exposure Limits**
Not available.

### Section 10. Stability and Reactivity Data

**Stability**
The product is stable.

**Instability Temperature**
Not available.

**Conditions of Instability**
Excess heat, incompatible materials

**Incompatibility with various substances**
Not available.

**Corrosivity**
Not available.
Section 11. Toxicological Information

Routes of Entry
Inhalation, Ingestion.

Toxicity to Animals
LD50: Not available.
LC50: Not available.

Chronic Effects on Humans
Not available.

Other Toxic Effects on Humans
Slightly hazardous in case of skin contact (irritant), of ingestion, of inhalation.

Special Remarks on Toxicity to Animals
Not available.

Special Remarks on Chronic Effects on Humans
Not available.

Special Remarks on other Toxic Effects on Humans
Acute Potential Health Effects:
Skin: May cause skin irritation.
Eyes: May cause eye irritation.
Inhalation: May cause respiratory tract irritation.
Ingestion: A massive dose is unlikely to cause adverse effects. If they do occur, adverse effects may include cause indigestion, nausea, vomiting, decreased or blurred vision, frequent urination, increased thirst, increased appetite, nervousness or restlessness, and trouble sleeping. It may also affect metabolism and cause disturbance of electrolyte balance which is manifest in the retention of sodium and water, with edema and hypertension, and in the increased excretion of potassium with the possibility of hypokalaemic alkalosis. Cardiac dysrhythmias/failure may be induced in sensitive individuals.

Chronic Potential Health Effects:
Skin: Prolonged or repeated skin contact may cause sensitization, an allergic reaction.
Eyes: Prolonged contact with eyes may affect vision (cataracts)
Inhalation/Ingestion: May cause anaphylaxis, an allergic reaction. Prolonged or repeated inhalation of corticosteroids may also cause thinning of the skin.
Ingestion: Prolonged or repeated ingestion of corticosteroids may cause acute adrenal insufficiency, osteoporosis and spontaneous due to mobilization of calcium and phosphorus, muscle weakness/muscle wasting, swelling of the feet or lower legs, hip or shoulder pain, irregular heartbeat, and effect glucose tolerance (carbohydrate metabolism) causing hyperglycemia, protein metabolism, lipid metabolism, the liver, pancreas (pancreatitis), behavior/central nervous system (nervousness or restlessness, trouble sleeping, mental disturbances such as psychosis, euphoria, depression). It may also affect the immune system (immunosuppressant) causing increased susceptibility to infections, metabolism (effects similar to that of acute ingestion in addition to weight gain or weight loss). Repeated large doses of corticosteroids may also produce Cushingoid symptoms typical of hyperactivity of the adrenal cortex, with moon-face, sometimes hiruitism (deepening of the voice), buffalo hump, flushing, increased bruising, ecchymoses, striae, and acne.
Other adverse effects include menstrual irregularities, amenorrhea, development of glaucoma and cataracts.

Note: Health Effects were extrapolated from "Corticosteroids" found in a reference called Martindale.

Section 12. Ecological Information

Ecotoxicity
Not available.

BOD5 and COD
Not available.

Products of Biodegradation
Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

Toxicity of the Products of Biodegradation
The product itself and its products of degradation are not toxic.
