SAFETY DATA SHEET

Preparation Date: 09/04/2015  Revision Date: 2/7/2017  Revision Number: G2

1. IDENTIFICATION

Product identifier

Product code: H-130
Product Name: HYDROCHLORIC ACID, 0.5 N, AQUEOUS SOLUTION

Other means of identification

Synonyms: No information available
CAS #: Mixture
RTECS #: Not available
CI#: Not available

Recommended use of the chemical and restrictions on use

Recommended use: No information available.
Uses advised against: No information available

Supplier:

Spectrum Chemical Mfg. Corp
14422 South San Pedro St.
Gardena, CA  90248
(310) 516-8000.

Order Online At: https://www.spectrumchemical.com
Emergency telephone number: Chemtrec 1-800-424-9300
Contact Person: Martin LaBenz (West Coast)
Contact Person: Ibad Tirmiz (East Coast)

2. HAZARDS IDENTIFICATION

Classification

This chemical is considered hazardous according to the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)
Considered a dangerous substance or mixture according to the Globally Harmonized System (GHS)

<table>
<thead>
<tr>
<th>Skin corrosion/irritation</th>

Label elements

Danger

Hazard statements
Causes severe skin burns and eye damage
May be corrosive to metals
Hazards not otherwise classified (HNOC)
Not Applicable

Other hazards
Not available

Precautionary Statements - Prevention
Do not breathe dust/fume/gas/mist/vapors/spray
Wash face, hands and any exposed skin thoroughly after handling
Wear protective gloves/protective clothing/eye protection/face protection
Keep only in original container

Precautionary Statements - Response
Immediately call a POISON CENTER or doctor/physician
Absorb spillage to prevent material damage
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.
IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower Wash contaminated clothing before reuse
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.
IF SWALLOWED: Rinse mouth. DO NOT induce vomiting

Precautionary Statements - Storage
Store locked up
Store in corrosive resistant/ .? container with a resistant inner liner

Precautionary Statements - Disposal
Dispose of contents/container to an approved waste disposal plant

4. FIRST AID MEASURES

First aid measures

General Advice: National Capital Poison Center in the United States can provide assistance if you have a poison emergency and need to talk to a poison specialist. Call 1-800-222-1222. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. First aider needs to protect himself.

Skin Contact: Wash off immediately with soap and plenty of water. Continue flushing with plenty of water for at least 15 minutes. Remove all contaminated clothes and shoes. Immediate medical attention is required. Call a physician immediately.

Eye Contact: Flush eyes with water for 15 minutes. Immediate medical attention is required. Call a physician immediately.

Product code: H-130
Product name: HYDROCHLORIC ACID, 0.5 N, AQUEOUS SOLUTION
Inhalation: Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. WARNING! It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled or ingested material is toxic, infectious or corrosive. Do not use mouth-to-mouth resuscitation if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Immediate medical attention is required. Call a physician immediately.

Ingestion: Do not induce vomiting without medical advice. Do not give Sodium Bicarbonate (Baking Soda). Never give anything by mouth to an unconscious person. If victim is conscious, give water or milk. Immediate medical attention is required. Call a physician or Poison Control Center immediately.

Most important symptoms and effects, both acute and delayed

Symptoms

Indication of any immediate medical attention and special treatment needed
Notes to Physician: Treat symptomatically.

Protection of first-aiders
First-Aid Providers: Avoid exposure to blood or body fluids. Wear gloves and other necessary protective clothing. Dispose of contaminated clothing and equipment as bio-hazardous waste.

5. FIRE-FIGHTING MEASURES

Extinguishing Media
Suitable Extinguishing Media: The product is not flammable. If it is involved in a fire, extinguish the fire using an agent suitable for the type of surrounding fire.

Unsuitable Extinguishing Media: No information available.

Specific hazards arising from the chemical

Hazardous Combustion Products: No information available.
Specific hazards:
For Hydrogen chloride/concentrated Hydrochloric acid:. Contact with metals may evolve flammable hydrogen gas. Calcium carbide reacts with hydrogen chloride gas with incandescence. Uranium phosphide reacts with hydrochloric acid to release spontaneously flammable phosphine. Rubidium acetylene carbide burns with slightly warm Hydrochloric acid. Lithium silicide in contact with hydrogen chloride becomes incandescent. When dilute hydrochloric acid is used, gas that is spontaneously flammable in air is evolved. Magnesium boride treated with concentrated hydrochloric acid produces spontaneously flammable gas. Cesium acetylene carbide burns in hydrogen chloride gas. Cesium carbide ignites in contact with Hydrochloric acid unless acid is dilute. Hydrogen chloride in contact with the following can cause an explosion, ignition on contact, or other violent/vigorous reaction: Acetic anhydride AgClO + CCl4 Alcohols +
Special Protective Actions for Firefighters

Specific Methods: No information available.
Special Protective Equipment for Firefighters: As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal Precautions: Keep people away from and upwind of spill/leak. Ensure adequate ventilation. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Use personal protective equipment. Avoid contact with skin, eyes and clothing.

Environmental precautions: Prevent further leakage or spillage if safe to do so. Should not be released into the environment. Do not let product enter drains. Prevent entry into waterways, sewers, basements or confined areas.

Methods and material for containment and cleaning up

Methods for containment: Stop leak if you can do it without risk.
Methods for cleaning up: Neutralize with Sodium carbonate or Sodium bicarbonate. Dilute with water. Absorb spill with inert material (e.g. vermiculite, dry sand or earth), then place in a suitable chemical waste container. Clean contaminated surface thoroughly.

7. HANDLING AND STORAGE

Precautions for safe handling

Technical Measures/Precautions: Use only in area provided with appropriate exhaust ventilation. Keep away from incompatible materials.

Safe Handling Advice: Wear personal protective equipment. Avoid contact with skin, eyes and clothing. Do not ingest. Do not breathe vapors or spray mist. Handle in accordance with good industrial hygiene and safety practice.

Conditions for safe storage, including any incompatibilities

Technical Measures/Storage Conditions: Keep container tightly closed in a dry and well-ventilated place. Store at room temperature in the original
container. May corrode metallic surfaces. Do not store in uncoated metallic containers. Store in a segregated and approved area. Store away from incompatible materials.

**Incompatible Materials:**
- Oxidizing agents
- Metals
- Bases
- Organic materials

### 8. EXPOSURE CONTROLS/PERSORAL PROTECTION

#### Control parameters

#### National occupational exposure limits

**United States**

#### Appropriate engineering controls

**Engineering measures to reduce exposure:** Ensure adequate ventilation. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors and mist below their respective threshold limit value.

**Individual protection measures, such as personal protective equipment**

**Personal Protective Equipment**

**Eye protection:** Face-shield or Goggles

**Skin and body protection:** Gloves. Chemical resistant apron. Long sleeved clothing. If working with large quantities: Chemical resistant protective suit. Boots.

**Respiratory protection:** Respiratory protection is not necessary for normal handling. Good room ventilation or use of local exhaust (fume hood) is sufficient. Use a vapor respirator under conditions where exposure to the substance is apparent (e.g. generation of high concentrations of mist or vapor, inadequate ventilation, development of respiratory tract irritation), and engineering controls are not feasible. Be sure to use an approved/certified respirator or equivalent.

**Product code:** H-130  
**Product name:** HYDROCHLORIC ACID, 0.5 N, AQUEOUS SOLUTION
Hygiene measures: Avoid contact with skin, eyes and clothing. When using, do not eat, drink or smoke. Wash hands before breaks and immediately after handling the product.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state: Liquid
Odor: Disagreeable. Choking.
Molecular/Formula weight: No information available
Flash Point Tested according to: Not available

Appearance: No information available.
Taste: Strong.
Flammability: No information available
Autoignition Temperature (°C/°F): No information available

Color: Clear. Colorless.
Flashpoint (°C/°F): No information available.

Reactivity
For Hydrogen chloride or concentrated Hydrochloric Acid:
Reacts with most metals to produce flammable Hydrogen gas.
Sodium reacts very violently with gaseous hydrogen chloride.
Calcium phosphide and Hydrochloric acid undergo a very energetic reaction.
Hydrogen chloride reacts with oxidizers releasing chlorine gas.
Hydrogen chloride gas is emitted when Hydrochloric acid comes in contact with Sulfuric acid.
Adsorption of Hydrochloric acid onto Silicon dioxide results in exothermic reaction.
Reacts violently with bases, oxidizers forming toxic chlorine gas.
Reacts, often violently or voraciously or exothermically, with acetic anhydride, active metals, aliphatic amines, alkanolamines, alkylene oxides, aromatic amines, amides, 2- aminoethanol, ammonia, ammonium hydroxide, calcium phosphate, chlorosulfonic acid, ethylene diamine, ethyleneimine, epichlorohydrin, isocyanates, metal acetylides, oleum, organic anhydrides, perchloric acid, 3-propiolactone, uranium phosphide, sulfuric acid, vinyl acetate, vinylidene fluoride, alcohols + hydrogen cyanide, Aluminum phosphate, Aluminum-titanium alloys, 2-Amino ethanol, Ammonium hydroxide, Ammonium, 1,4-Benzquinone diimine, Cesium telluroacetylated, Chlorine + dinitroanilines, Chlooroacetdehyde oxime, Cyanogen chloride, 1,1-Difluoroethylen, dinitroanilines, Ethylene, Ethyl 2-formylpropionate oxime, Hexalithium disilicide, Hydrogen peroxide, Methyl vinyl ether, Nitric acid + glycerol, Potassium, Potassium permanganate, beta-Propiolactone, Propylene oxide, Rubidium acetylde, Silver chloride, Sodium 2-allyloxy-6-nitrophenylpyruvate oxime, Sodium hydroxide, Sodium tetranitride, 2,4,6-Tri(2-acetylyhydradnin)-1,3,5-trinitrobenzene, Sulfonic acid, Cesium cyanoctridehydrodecarborate(2-), Potassium ferricyanide, Vinyldene fluoride, Potassium ferrocyanide, Ammonium hexacyanoferrate (II).
Reaction with oxidizers such as permanganates, chlorates, chlorites, and hypochlorites may produce chlorine or bromine gas.

Product code: H-130
Product name: HYDROCHLORIC ACID, 0.5 N, AQUEOUS SOLUTION
Reacts vigorously with alkalies and with many organic materials. Cesium acetylene carbide burns in hydrogen chloride gas. Lithium silicide in contact with hydrogen chloride becomes incandescent. Magnesium boride in contact with concentrated hydrochloric acid produces spontaneously flammable gas. Rubidium acetylene carbide burns with slightly warm hydrochloric acid. Rubidium carbide ignites in contact with hydrochloric acid unless acid is dilute. Uranium phosphide reacts with hydrochloric acid to release spontaneously flammable phosphine. Calcium carbide reacts with hydrogen chloride gas with incandescence. Absorption of gaseous hydrogen chloride on mercuric sulfate becomes violent @ 125 deg C. Reaction of silver perchlorate with carbon tetrachloride in presence of small amount of hydrochloric acid produces trichloromethyl perchlorate, which detonates @ 40 deg C. Cesium carbide ignites in contact with hydrochloric acid unless acid is dilute. Hydrochloric acid in the presence of alcohol and glycols results in dehydration reactions. Exothermic reaction with water. Attacks some plastics, rubber, and coatings. Hydrogen chloride causes aldehydes and epoxides to violently polymerize.

**Chemical stability**

**Stability:** Stable under recommended storage conditions.

**Possibility of Hazardous Reactions:** Hazardous polymerization does not occur

**Conditions to avoid:** Stable at normal conditions.

**Incompatible Materials:** Oxidizing agents
Metals
Bases
Organic materials

**Hazardous decomposition products:** Hydrogen chloride gas. Hydrogen. Hydrogen, by reaction with metals.

**Other Information**

**Corrosivity:** No information available

**Special Remarks on Corrosivity:** No information available

### 11. TOXICOLOGICAL INFORMATION

**Information on likely routes of exposure**

**Principal Routes of Exposure:**
Skin. Inhalation. Ingestion.

**Acute Toxicity**

Symptoms

Skin Contact: Corrosive. Severe skin irritation. Causes skin burns.

Eye Contact: Corrosive. Causes severe eye irritation/conjunctivitis, burns, corneal necrosis.

Inhalation Irritating to respiratory system. May cause chemical burns to the respiratory tract. Inhalation of mist or vapor causes irritation of the nose, throat, bronchi, larynx (upper respiratory tract), coughing, sneezing, hoarseness of the voice and possible burns of the respiratory tract. It may affect the liver. It may affect the lungs.

Ingestion Causes severe irritation and burning of the mouth, throat, esophagus and gastrointestinal tract. May cause nausea, vomiting, and diarrhea, thirst, difficulty swallowing, salivation. May affect behavior (excitement), the cardiovascular system (weak rapid pulse, tachycardia), respiration (shallow respiration), and urinary system (kidneys- renal failure, nephritis).

Aspiration hazard No information available.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Product code: H-130

Product name: HYDROCHLORIC ACID, 0.5 N, AQUEOUS SOLUTION
Chronic Toxicity

Prolonged or repeated inhalation may affect respiratory tract (changes in pulmonary function, chronic bronchitis, overt respiratory tract abnormalities. Prolonged or repeated inhalation and/or ingestion may affect liver, teeth (yellowing of teeth and erosion of tooth enamel), kidneys, and behavior (excitement, muscle contraction or spasticity). Prolonged or repeated skin contact may cause dermatitis. Prolonged or repeated eye contact with vapor/mist can cause conjunctivitis.

Sensitization:
No information available.

Mutagenic Effects:
For Hydrogen Chloride/Hydrochloric Acid:
Animal experiments showed mutagenic effects
Cyto genetic Analysis - chromosome aberration test (Chinese Hamster ovary): Genotoxic effects were observed

Carcinogenic effects:
Not considered carcinogenic.

Persistence and degradability: No information available
Bioaccumulative potential: No information available.
Mobility: No information available.

### 13. DISPOSAL CONSIDERATIONS

#### Disposal Methods

**Waste from residues / unused products:**
Waste must be disposed of in accordance with Federal, State and Local regulation.

**Contaminated packaging:**
Empty containers should be taken for local recycling, recovery or waste disposal

The product is classified in accordance with Annex VI to Directive 67/548/EEC

### Indication of danger:

Xi - Irritant.

### 16. OTHER INFORMATION

Preparation Date: 09/04/2015

Product code: H-130  
Product name: HYDROCHLORIC ACID, 0.5 N, AQUEOUS SOLUTION
