**Continued on Next Page**
Section 3. Hazards Identification

Potential Acute Health Effects

Very hazardous in case of skin contact (irritant), of eye contact (irritant), of ingestion. Hazardous in case of skin contact (corrosive), of eye contact (corrosive). The amount of tissue damage depends on length of contact. Eye contact can result in corneal damage or blindness. Skin contact can produce inflammation and blistering. Inhalation of dust will produce irritation to gastro-intestinal or respiratory tract, characterized by burning, sneezing and coughing. Severe over-exposure can produce lung damage, choking, unconsciousness or death. Prolonged exposure may result in skin burns and ulcerations. Over-exposure by inhalation may cause respiratory irritation. Inflammation of the eye is characterized by redness, watering, and itching. Skin inflammation is characterized by itching, scaling, reddening, or, occasionally, blistering.

Potential Chronic Health Effects

Carcinogenic Effects: Classified 3 (Not classifiable for human.) by IARC [Lithium Hypochlorite, dry].
Mutagenic Effects: Mutagenic for mammalian somatic cells. [Sodium chloride]. Mutagenic for bacteria and/or yeast. [Sodium chloride]. Mutagenic for mammalian somatic cells. [Lithium chloride]. Mutagenic for bacteria and/or yeast. [Lithium chloride]. Mutagenic for mammalian somatic cells. [Lithium carbonate].
Teratogenic Effects: Classified POSSIBLE for human [Lithium chloride].
Developmental Toxicity: Classified Reproductive system/toxin/female, Reproductive system/toxin/male [POSSIBLE] [Lithium chloride].
The substance may be toxic to kidneys, peripheral nervous system, gastrointestinal tract, cardiovascular system, upper respiratory tract, skin, eyes, central nervous system (CNS), thyroid.
Repeated or prolonged exposure to the substance can produce target organs damage. Repeated exposure of the eyes to a low level of dust can produce eye irritation. Repeated skin exposure can produce local skin destruction, or dermatitis. Repeated inhalation of dust can produce varying degree of respiratory irritation or lung damage. Repeated exposure to a highly toxic material may produce general deterioration of health by an accumulation in one or many human organs.

Section 4. First Aid Measures

Eye Contact

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. Get medical attention immediately.

Skin Contact

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Cover the irritated skin with an emollient. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention immediately.

Serious Skin Contact

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek immediate medical attention.

Inhalation

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Serious Inhalation

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. WARNING: It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled material is toxic, infectious or corrosive. Seek immediate medical attention.
**Ingestion**
Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If large quantities of this material are swallowed, call a physician immediately. Loosen tight clothing such as a collar, tie, belt or waistband.

**Serious Ingestion**
Not available.

---

**Section 5. Fire and Explosion Data**

**Flammability of the Product**
Non-flammable.

**Auto-Ignition Temperature**
Not applicable.

**Flash Points**
Not applicable.

**Flammable Limits**
Not applicable.

**Products of Combustion**
Not available.

**Fire Hazards in Presence of Various Substances**
of combustible materials of organic materials

**Explosion Hazards in Presence of Various Substances**
Slightly explosive in presence of heat.
Non-explosive in presence of open flames and sparks, of shocks.

**Fire Fighting Media and Instructions**
Not applicable.

**Special Remarks on Fire Hazards**
Contact with combustible or organic materials may cause fire.
Hazardous Decomposition Products: oxygen, lithium hydroxide, and lithium chlorates.

**Special Remarks on Explosion Hazards**
Electrolysis of sodium chloride in presence of nitrogenous compounds to produce chlorine may lead to formation of explosive nitrogen trichloride.
Potentially explosive reaction with dichloromaleic anhydride + urea. (Sodium chloride)

---

**Section 6. Accidental Release Measures**

**Small Spill**
Use appropriate tools to put the spilled solid in a convenient waste disposal container. If necessary: **Neutralize the residue with a dilute solution of acetic acid.**

**Large Spill**
Oxidizing material. Corrosive solid. Poisonous solid.
Stop leak if without risk. Do not get water inside container. Avoid contact with a combustible material (wood, paper, oil, clothing...). Keep substance damp using water spray. Do not touch spilled material. Use water spray to reduce vapors. Prevent entry into sewers, basements or confined areas; dike if needed. Call for assistance on disposal. **Neutralize the residue with a dilute solution of acetic acid.** Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

---

**Section 7. Handling and Storage**

**Precautions**
Keep away from heat. Keep away from sources of ignition. Keep away from combustible material. Do not ingest. Do not breathe dust. Never add water to this product. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidizing agents, combustible materials, organic materials, acids.

**Storage**

---

Continued on Next Page
### Section 8. Exposure Controls/Personal Protection

**Engineering Controls**
Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

**Personal Protection**
- Splash goggles.
- Synthetic apron.
- Vapor and dust respirator.
- Be sure to use an approved/certified respirator or equivalent.
- Gloves.

**Personal Protection in Case of a Large Spill**
- Splash goggles.
- Full suit.
- Vapor and dust respirator.
- Boots.
- Gloves.
- A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Exposure Limits**
- **Lithium hydroxide**
  - STEL: 1 (mg/m³) [United Kingdom (UK)]
  - CEIL: 1 from AIHA [United States]

Consult local authorities for acceptable exposure limits.

### Section 10. Stability and Reactivity Data

| Stability                      | The product is stable. |
| Instability Temperature        | Not available.          |
| Conditions of Instability      | Incompatible materials  |
| Incompatibility with various substances | Reactive with combustible materials, organic materials, acids. Slightly reactive to reactive with metals, alkalis. |
| Corrosivity                    | Not available.          |
| Special Remarks on Reactivity  | Incompatible with oxidizable materials |

**Continued on Next Page**
**Section 11. Toxicological Information**

### Routes of Entry
- Inhalation
- Ingestion

### Toxicity to Animals
- **Acute oral toxicity (LD50):** 210 mg/kg [Rat]. (Lithium hydroxide).
- **Acute dermal toxicity (LD50):** >2000 mg/kg [Rabbit]. (Lithium chloride).

### Chronic Effects on Humans
- **CARCINOGENIC EFFECTS:** Classified 3 (Not classifiable for human.) by IARC [Lithium Hypochlorite, dry].
- **MUTAGENIC EFFECTS:** Mutagenic for mammalian somatic cells. [Sodium chloride]. Mutagenic for bacteria and/or yeast. [Sodium chloride]. Mutagenic for mammalian somatic cells. [Lithium chloride]. Mutagenic for bacteria and/or yeast. [Lithium chloride]. Mutagenic for mammalian somatic cells. [Lithium carbonate].
- **TERATOGENIC EFFECTS:** Classified POSSIBLE for human [Lithium chloride].
- **DEVELOPMENTAL TOXICITY:** Classified Reproductive system/toxin/female, Reproductive system/toxin/male [POSSIBLE] [Lithium chloride].
- Contains material which may cause damage to the following organs: kidneys, peripheral nervous system, gastrointestinal tract, cardiovascular system, upper respiratory tract, skin, eyes, central nervous system (CNS), thyroid.

### Other Toxic Effects on Humans
- Very hazardous in case of skin contact (irritant), of ingestion, of inhalation.
- Hazardous in case of skin contact (corrosive), of eye contact (corrosive).

### Special Remarks on Toxicity to Animals

Causes adverse reproductive effects in humans (fetotoxicity, abortion.) by intraplacental route. High intake of sodium chloride, whether from occupational exposure or in the diet, may increase risk of TOXEMIA OF PREGNANCY in susceptible women (Bishop, 1978). Hypertonc sodium chloride solutions have been used to induce abortion in late pregnancy by direct infusion into the uterus (Brown et al, 1972), but this route of administration is not relevant to occupational exposures.

May cause adverse reproductive effects and birth defects in animals, particularly rats and mice (fetotoxicity, abortion, musculoskeletal abnormalities, and maternal effects (effects on ovaries, fallopian tubes) by oral, intraperitoneal, intraplacental, intruterine, parenteral, and subcutaneous routes. While sodium chloride has been used as a negative control n some reproductive studies, it has also been used as an example that almost any chemical can cause birth defects in experimental animals if studied under the right conditions (Nishimura & Miyamoto, 1969). In experimental animals, sodium chloride has caused delayed effects on newborns, has been fetotoxic, and has caused birth defects and abortions in rats and mice (RTECS, 1997).

May affect genetic material (mutagenic) (Sodium chloride)

### Special Remarks on Chronic Effects on Humans

**Acute Potential Health Effects:**
- Skin: Corrosive. Can cause severe skin irritation and burns.
- Eyes: Corrosive. Can cause severe irritation and burns. Can cause severe corneal and conjunctival edema.
- Inhalation: It causes respiratory tract (nose, throat, lungs) irritation. It can be corrosive to the mucous membranes and may cause chemical burns to the respiratory tract. It can cause inflammation, bronchospasm, edema of the larynx and bronchi, chemical pneumonitis, and pulmonary edema. It can affect respiration (shortness of breath) and cause burning sensation, coughing, wheezing, laryngitis. It may also cause nausea, vomiting, and headache.
- Ingestion: Corrosive. Harmful if swallowed. Causes severe gastrointestinal/digestive tract irritation, and burns. May cause permanent tissue destruction (burns), perforations, strictures, and other effects of the digestive tract (e.g. stomach). Symptoms may include abdominal pain, nausea, vomiting, diarrhea, and burning sensation in the mouth, throat (esophagus), stomach. May also affect behavior/central nervous system/nervous system (headache, somnolence, tremors, disorientation, confusion, irritability, impaired concentration, lethargy, confusion, drowsiness, dizziness, blurred vision, hallucinations, distorted perceptions, ataxia, seizures, excitement, muscle weakness, tremor, apathy, convulsions, coma), metabolism (metabolic acidosis, loss of appetite, weight loss). May cause kidney damage. May also affect respiration (shortness of breath, respiratory depression), eye (pupillary constriction, blurred vision), cardiovascular system, liver, blood, and brain (degenerative changes). It may also cause coughing, wheezing and laryngitis.
- Chronic Potential Health Effects:
  - Ingestion: Lithium's toxicity is due to its cumulative effects. It causes poor appetite, weight loss, weakness, fatigue, dehydration, thirst, dryness of mouth. Finer tremors of the hands, lips, or jaw may be apparent signs of involvement of the nervous system/central nervous system, together with loss of coordination, mental confusion, dizziness, blurred vision, drowsiness, and hyperactivity of the nervous system, including twitching and seizures, as well as coma. It may also cause “restless leg syndrome”, a peripheral neuropathy involving a
creeping sensation with a desire to rub or move the legs, goiter/thyroid disturbances, skin effects (various types of allergic dermatitis such as psoriasis, cutaneous ulcers, follicular papules, exfoliate dermatitis, xerosis cutis, acne, anesthesia of the skin as well as alopecia), ringing in the ears. It may also affect liver (liver function tests impaired), kidneys (renal dysfunction/kidney damage, impairment of renal function due to electrolyte imbalance), and blood (pigmented or nucleated red blood cells), eyes/vision (visual abnormalities, loss of vision), cardiovascular system, metabolism (metabolic acidosis, electrolyte imbalance), brain, liver, blood, and endocrine system (adrenal gland).

<tr>
<td>Special Remarks on the Products of Biodegradation</td>
<td>This product is toxic to fish and aquatic organisms. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDes) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water board or Regional office of the EPA.</td>
</tr>

**Section 13. Disposal Considerations**

**Waste Disposal**

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

**Section 14. Transport Information**

**DOT Classification**

CLASS 5.1: Oxidizing material.

**Identification**

Lithium Hypochlorite mixtures, dry with more than 39% available chlorine (Lithium Hypochlorite, dry) UNNA: 1471. PG: II

**Special Provisions for Transport**

Not available.

**DOT (Pictograms)**

[![OXIDIZER 5.1](image)](image)

**Section 15. Other Regulatory Information and Pictograms**

**Federal and State Regulations**

California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer, birth defects or other reproductive harm, which would require a warning under the statute: Lithium carbonate

California prop. 65: This product contains the following ingredients for which the State of California has found to cause birth defects which would require a warning under the statute: Lithium carbonate

Connecticut hazardous material survey.: Lithium Hypochlorite, dry; Potassium bisulfate

Pennsylvania RTK: Sodium sulfate anhydrous

Minnesota: Lithium hydroxide

Massachusetts RTK: Sodium sulfate anhydrous; Lithium carbonate

New Jersey: Lithium Hypochlorite, dry; Potassium bisulfate; Lithium carbonate

New Jersey spill list: Lithium carbonate

TSCA 8(b) inventory: Lithium Hypochlorite, dry; Sodium chloride; Sodium sulfate anhydrous; Potassium bisulfate; Lithium chloride; Lithium carbonate; Lithium hydroxide; Water

SARA 313 toxic chemical notification and release reporting: Lithium carbonate 2%
**Lithium Hypochlorite, mixture, dry**
