### Appropriate engineering controls

#### Engineering measures to reduce exposure:

Ensure adequate ventilation. Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

### Individual protection measures, such as personal protective equipment

#### Personal Protective Equipment

- Eye protection:** Safety glasses with side-shields. or Goggles
- Skin and body protection:** Chemical resistant apron  
Long sleeved clothing  
Gloves
- Respiratory protection:** Effective dust mask. Use a dust respirator under conditions where exposure to the substance is apparent (e.g. generation of high concentration of dust (dust clouds) , inadequate ventilation, development of respiratory tract irritation), and engineering controls are not feasible. Be sure to use an approved/certified respirator or equivalent.
- Hygiene measures:** Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product When using, do not eat, drink or smoke.

## **Symptoms**

**Skin Contact:** May cause skin irritation. When skin is intact, it is unlikely to result in absorption of harmful amounts which may cause hypercalcemia, and hypokalemia. However, repeated application to denuded or burned skin has been associated with a syndrome of high anion gap acidosis, hypercalcemia, hyperosmolality, and renal failure.

**Eye Contact:** May cause eye irritation. May cause slight temporary eye irritation.

**Inhalation** At room temperature, exposure to vapor is minimal due to low volatility. A single exposure is not likely to be hazardous.

**Ingestion** May cause digestive (gastrointestinal) tract irritation. Ingestion may cause nausea, vomiting, diarrhea. May cause abdominal discomfort. May cause flatulence. May cause taste perversion.
