# Material Safety Data Sheet

**Section 1. Chemical Product and Company Identification**

**Common Name/Trade Name**

Reagent Alcohol, 50% (v/v; 1+1) solution

**Manufacturer**

SPECTRUM LABORATORY PRODUCTS INC. 14422 S. SAN PEDRO STREET GARDENA, CA 90248

**Commercial Name(s)**

Not available.

**Synonym**

Not available.

**Chemical Name**

Not applicable.

**Chemical Family**

Aliphatic alcohol or glycol. (Solvent.)

**Chemical Formula**

Not applicable.

**Supplier**

SPECTRUM LABORATORY PRODUCTS INC. 14422 S. SAN PEDRO STREET GARDENA, CA 90248

---

**Section 2. Composition and Information on Ingredients**

**Toxicological Data on Ingredients**

- **Ethyl alcohol 200 Proof:**
  - **ORAL (LD50):** Acute: 7060 mg/kg [Rat]. 3450 mg/kg [Mouse].
  - **VAPOR (LC50):** Acute: 20000 ppm 8 hours [Rat]. 39000 mg/m³ 4 hours [Mouse].

- **Isopropyl alcohol:**
  - **ORAL (LD50):** Acute: 5045 mg/kg [Rat]. 3600 mg/kg [Mouse]. 6410 mg/kg [Rabbit].
  - **DERMAL (LD50):** Acute: 12800 mg/kg [Rabbit].

- **Methyl alcohol:**
  - **ORAL (LD50):** Acute: 5628 mg/kg [Rat].
  - **DERMAL (LD50):** Acute: 15800 mg/kg [Rabbit].
  - **VAPOR (LC50):** Acute: 64000 ppm 4 hours [Rat].
### Section 3. Hazards Identification

**Potential Acute Health Effects**
Hazardous in case of skin contact (irritant), of eye contact (irritant), of ingestion. Slightly hazardous in case of skin contact (permeator).

**Potential Chronic Health Effects**
Slightly hazardous in case of skin contact (sensitizer).

**Carcinogenic Effects**
- Classified A4 (Not classifiable for human or animal.) by ACGIH [Ethyl alcohol 200 Proof].
- Classified A4 (Not classifiable for human or animal.) by ACGIH, 3 (Not classifiable for human.) by IARC [Isopropyl alcohol].

**Mutagenic Effects**
- Mutagenic for mammalian somatic cells. [Ethyl alcohol 200 Proof].
- Mutagenic for bacteria and/or yeast. [Ethyl alcohol 200 Proof].
- Mutagenic for mammalian somatic cells. [Methyl alcohol].
- Mutagenic for bacteria and/or yeast. [Methyl alcohol].

**Teratogenic Effects**
- Classified PROVEN for human [Ethyl alcohol 200 Proof].
- Classified POSSIBLE for human [Methyl alcohol].

**Developmental Toxicity**
- Classified Development toxin [PROVEN] [Ethyl alcohol 200 Proof].
- Classified Reproductive system/toxin/female, Reproductive system/toxin/male [POSSIBLE] [Ethyl alcohol 200 Proof].

The substance is toxic to blood, liver, eyes, central nervous system (CNS).

The substance may be toxic to kidneys, the reproductive system, heart, brain, peripheral nervous system, upper respiratory tract, skin, optic nerve.

Repeated or prolonged exposure to the substance can produce target organs damage.

### Section 4. First Aid Measures

**Eye Contact**
Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Get medical attention.

**Skin Contact**
In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

**Serious Skin Contact**
Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek medical attention.

**Inhalation**
If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms appear.

**Serious Inhalation**
Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek medical attention.

**Ingestion**
Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention if symptoms appear.

**Serious Ingestion**
For Methyl Alcohol:
1. Support vital functions, correct for dehydration and shock, and manage fluid balance.
2. The currently recommended medical management of Methanol poisoning includes the following methods:
   a. Emptying the stomach by gastric lavage. It is useful if initiated within < 1 of ingestion.
   b. Correct metabolic acidosis with intravenous administration of sodium bicarbonate, adjusting the administration rate according to repeated and frequent measurement of acid/base status.
   c. Administer ethanol (orally or by IV (intravenously)) or Fomepizole (4-methylpyrazole or Antizol) therapy by IV as an antidote to inhibit the formation of toxic metabolites. Adjunct therapy with Leucovin followed by Folate can also be initialized. Please note that if Ethanol therapy is used, monitor blood glucose, especially in children. Ethanol can cause hypoglycemia.
   d. If patients are diagnosed and treated early in the course with the above methods, hemodialysis may be avoided if fomepizole or ethanol therapy is effective and has corrected the metabolic acidosis, and no renal failure is present. However, once severe acidosis and renal failure occurred, however, hemodialysis is necessary. Hemodialysis is effective in removing Methyl alcohol and toxic metabolites, and correcting metabolic acidosis.

<tr>
<td>Fire Fighting Media and Instructions</td>
<td>Flammable liquid, soluble or dispersed in water. SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use alcohol foam, water spray or fog.</td>
</tr>
</tbody>
</table>

### Special Remarks on Fire Hazards
Containers should be grounded. CAUTION: MAY BURN WITH NEAR INVISIBLE FLAME. Vapor may travel considerable distance to source of ignition and flash back. May form explosive mixtures with air. Contact with Bromine pentafluoride is likely to cause fire or explosion. Ethanol ignites on contact with chromyl chloride. Ethanol ignites on contact with iodine heptafluoride gas. It ignites than explodes upon contact with nitrosoyl perchlorate. Addition of platinum black catalyst caused ignition. (Ethyl alcohol 200 Proof)

### Special Remarks on Explosion Hazards
Ethanol has an explosive reaction with the oxidized coating around potassium metal. Ethanol ignites and then explodes on contact with acetic anhydride + sodium hydrosulfate (ignites and may explode), disulfuric acid + nitric acid, phosphorous(III) oxide platinum, potassium-tert-butoxide+ acids. Ethanol forms explosive products in reaction with the following compound: ammonia + silver nitrate (forms silver nitride and silver fulminate), iodine + phosphorus (forms ethane iodide), magnesium perchlorate (forms ethyl perchlorate), mercuric nitrate, nitric acid + silver (forms silver fulminate) silver nitrate (forms ethyl nitrate) silver(I) oxide + ammonia or hydrazine (forms silver nitride and silver fulminate), sodium (evolves hydrogen gas). Sodium Hydrazide + alcohol can produce an explosion. Alcohols should not be mixed with mercuric nitrate, as explosive mercuric fulminate may be formed. May form explosive mixture with manganese perchlorate + 2,2-dimethoxypropane. Addition of alcohols to highly concentrate hydrogen peroxide forms powerful explosives. Exploses on contact with calcium hypochlorite. Vapor may explode if ignited in an enclosed area. Containers may explode when heated or involved in a fire. Vapors may form explosive mixtures with air. (Ethyl alcohol 200 Proof)

### Section 6. Accidental Release Measures

<table>
<thead>
<tr>
<th>Small Spill</th>
<th>Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Large Spill</td>
<td>Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dilute if needed. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.</td>
</tr>
</tbody>
</table>

## Section 7. Handling and Storage

**Precautions**
- Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/vapor/spray. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidizing agents, metals, acids, alkalis.

**Storage**
- Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).
- Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/vapor/spray. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidizing agents, metals, acids, alkalis.

## Section 8. Exposure Controls/Personal Protection

### Engineering Controls
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

### Personal Protection
- Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

### Personal Protection in Case of a Large Spill
- Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Reagent Alcohol, 50% (v/v; 1+1) solution**

**Volutility**
100% (w/w). (Isopropyl alcohol.)

**Odor Threshold**
The highest known value is 100 ppm (Ethyl alcohol 200 Proof). Weighted average: 96.1 ppm

**Water/Oil Dist. Coeff.**
The product is equally soluble in oil and water.

**Ionicity (in Water)**
Non-ionic.

**Dispersion Properties**
See solubility in water, methanol, diethyl ether, n-octanol, acetone.

**Solubility**
Easily soluble in cold water, hot water, n-octanol. Soluble in methanol, diethyl ether, acetone.

---

**Section 10. Stability and Reactivity Data**

**Stability**
The product is stable.

**Instability Temperature**
Not available.

**Conditions of Instability**
Heat, ignition sources (flames, sparks, static), incompatible materials

**Incompatibility with various substances**
Reactive with oxidizing agents, metals, acids, alkalis.

**Corrosivity**
Non-corrosive in presence of glass.

**Special Remarks on Reactivity**
Ethanol rapidly absorbs moisture from the air. Can react vigorously with oxidizers. The following oxidants have been demonstrated to undergo vigorous/explosive reaction with ethanol: barium perchlorate, bromine pentfluoride, calcium hypochlorite, chlorate, chloryl perchlorate, chromium trioxide, chromyl chloride, dioxogen difluoride, disulfuryl difluoride, fluorine nitrate, hydrogen peroxide, iodine heptfluoride, nitric acid, nitrosyl perchlorate, perchloric acid, permanganic acid, peroxodisulfuric acid, potassium dioxide, potassium perchlorate, potassium permanganate, rhenium(VIII) oxide, silver perchlorate, silver peroxide, uranium hexafluoride, uranyl perchlorate, chlorine.

Ethanol reacts violently/expodes with the following compounds: acetyl bromide (evolves hydrogen bromide) acetyl chloride, aluminum sesquibromide ethylate, active metals, aluminum, alkali metals, isocyanates, halogens, hydrazine, caustics (ammonia, ammonium hydroxide, calcium hydroxide, potassium hydroxide, sodium hydroxide), acid anhydrides, ammonia or hyrazine + silver oxide, chlorate, chromic anhydride, cyanuric acid + water, dichloromethane + sulfuric acid + nitrate (or) nitrite, hydrogen peroxide + sulfuric acid, iodine + phosphorus, iodine + methanol + mercuric oxide, magnesium perchlorate, manganese perchlorate + 2,2-dimethoxy propane, perchlorates, chromates, permanganates + sulfuric acid, potassium superoxide, potassium tert-butoxide, silver & nitric acid, silver perchlorate, sodium hydroxide, sulfuric acid + sodium dichromate, tetrachlorosilane + water, mercuric nitrate, acetic anhydride + sodium hydrosulfate, disulfuric acid + nitric acid, phosphorous (III) oxide, potassium tert-butoxide + acids. Ethanol is also incompatible with platinum, and sodium.

No really safe conditions exist under which ethyl alcohol and chlorine oxides can be handled. Reacts vigorously with acetyl chloride (Ethyl alcohol 200 Proof)

**Special Remarks on Corrosivity**
Not available.

**Polymerization**
Will not occur.

---

**Section 11. Toxicological Information**

**Routes of Entry**
Absorbed through skin. Eye contact. Inhalation. Ingestion.

**Toxicity to Animals**

**Chronic Effects on Humans**
CARCINOGENIC EFFECTS: Classified A4 (Not classifiable for human or animal.) by ACGIH [Ethyl alcohol 200 Proof]. Classified A4 (Not classifiable for human or animal.) by IARC [Isopropyl alcohol].

DEVELOPMENTAL TOXICITY: Classified Development toxin [PROVEN] [Ethyl alcohol 200 Proof]. Classified

**Continued on Next Page**
Reagent Alcohol, 50% (v/v; 1+1) solution

Repertive system/toxin/female, Repertive system/toxin/male [POSSIBLE] [Ethyl alcohol 200 Proof].
Contains material which may cause damage to the following organs: kidneys, the reproductive system, heart, brain, peripheral nervous system, upper respiratory tract, skin, optic nerve.

Hazardous in case of skin contact (irritant), of ingestion, of inhalation.
Slightly hazardous in case of skin contact (permeator).

Other Toxic Effects on Humans

Slightly hazardous in case of skin contact (permeator).

Special Remarks on Toxicity to Animals

Lowest Published Dose/Conc:
LDL[Human] - Route: Oral; Dose: 1400 mg/kg
LDL[Human child] - Route: Oral; Dose: 2000 mg/kg
LDL[Rabbit] - Route: Skin; Dose: 20000 mg/kg (Ethyl alcohol 200 Proof)

Special Remarks on Chronic Effects on Humans

May affect genetic material (mutagenic)
Causes adverse reproductive effects and birth defects (teratogenic), based on moderate to heavy consumption.
May cause cancer based on animal data.
Human: passes through the placenta, excreted in maternal milk. (Ethyl alcohol 200 Proof)

Special Remarks on other Toxic Effects on Humans

Acute potential health effects:
Skin: causes skin irritation
Eyes: causes eye irritation
Ingestion: May cause gastrointestinal tract irritation with nausea, vomiting, diarrhea, and alterations in gastric secretions. May affect the brain, behavior/central nervous system (central nervous system depression - amnesia, headache, muscular incoordination, excitation, mild euphoria, slurred speech, drowsiness, staggering gait, fatigue, changes in mood/personality, excessive talking, dizziness, ataxia, somnolence, coma/narcosis, hallucinations, distorted perceptions, general anesthetic), peripheral nervous system (spastic paralysis), vision (diplopia).
Moderately toxic and narcotic in high concentrations. May also affect metabolism, blood, liver, respiration (dyspnea), and endocrine system. Contains Methanol, which may cause blindness if swallowed
May affect respiratory tract, cardiovascular(cardiac arrhythmias, hypotension), and urinary systems.
Inhalation: May cause irritation of the respiratory tract and affect brain, behavior/central nervous system with symptoms similar to ingestion.
Chronic Potential Health Effects:
Skin: Prolonged or repeated skin contact may cause dermatitis, an allergic reaction.
Ingestion: Prolonged or repeated ingestion will have similar effects as acute ingestion. It may also affect the brain.

Section 12. Ecological Information

Ecotoxicity
Not available.

BOD5 and COD
Not available.

Products of Biodegradation
Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

Toxicity of the Products of Biodegradation
The product itself and its products of degradation are not toxic.

Special Remarks on the Products of Biodegradation
Methanol in water is rapidly biodegraded and volatilized. Aquatic hydrolysis, oxidation, photolysis, adsorption to sediment, and bioconcentration are not significant fate processes. The half-life of methanol in surfact water ranges from 24 hrs. to 168 hrs.
Based on its vapor pressure, methanol exists almost entirely in the vapor phase in the ambient atmosphere. It is degraded by reaction with photochemically produced hydroxyl radicals and has an estimated half-life of 17.8 days.
Methanol is physically removed from air by rain due to its solubility. Methanol can react with NO2 in polluted to form methyl nitrate.
The half-life of methanol in air ranges from 71 hrs. (3 days) to 713 hrs. (29.7 days) based on photooxidation half-life in air. (Methyl alcohol)

Section 13. Disposal Considerations

Waste Disposal
Waste must be disposed of in accordance with federal, state and local environmental control regulations.
