Polyvinyl Alcohol, 99-100 Percent, Hydrolyzed, Reagent

Description

Polyvinyl Alcohol, 99-100 Percent, Hydrolyzed, Reagent, also known as PVA or PVAI, is a synthetic polymer used in textiles, papermaking, and several types of coatings. The Reagent grade denotes that this chemical is the highest quality commercially available and that the American Chemical Society has not officially set any specifications for this material. Spectrum Chemical manufactured Reagent grade products meet the toughest regulatory standards for quality and purity.
