## 2. HAZARDS IDENTIFICATION

#### Classification

This chemical is considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

Acute toxicity - Oral	Category 3
Acute toxicity - Dermal	Category 3
Acute toxicity - Inhalation (Gases)	Category 3
Acute toxicity - Inhalation (Vapors)	Category 3
Acute toxicity - Inhalation (Dusts/Mists)	Category 3
Skin corrosion/irritation	Category 1Sub-category B
Serious eye damage/eye irritation	Category 1
Reproductive toxicity	Category 2
Specific target organ toxicity (single exposure)	Category 1
Specific target organ toxicity (repeated exposure)	Category 1
Flammable liquids	Category 2

#### Label elements

#### Danger

## Hazard statements

Toxic if swallowed

Toxic in contact with skin

Toxic if inhaled

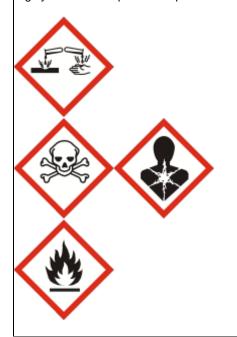

Causes severe skin burns and eye damage

Suspected of damaging fertility or the unborn child

Causes damage to organs

Causes damage to organs through prolonged or repeated exposure

Highly flammable liquid and vapor

## Hazards not otherwise classified (HNOC)

Not Applicable

#### Other hazards

May cause blindness if swallowed

## **Precautionary Statements - Prevention**

Obtain special instructions before use

Do not handle until all safety precautions have been read and understood

Wear protective gloves/protective clothing/eye protection/face protection

Wash face, hands and any exposed skin thoroughly after handling

Do not eat, drink or smoke when using this product

Use only outdoors or in a well-ventilated area

Do not breathe dust/fume/gas/mist/vapors/spray

Keep away from heat/sparks/open flames/hot surfaces. — No smoking

Keep container tightly closed

Ground/bond container and receiving equipment

Use explosion-proof electrical/ventilating/lighting/ .? /equipment

Use only non-sparking tools

Product code: S1531

Take precautionary measures against static discharge

Keep cool

#### **Precautionary Statements - Response**

Specific treatment (see .? on this label)

Immediately call a POISON CENTER or doctor/physician

Specific treatment (see .? on this label)

In case of fire: Use CO2, dry chemical, or foam to extinguish.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower

Wash contaminated clothing before reuse

IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.

IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician

Rinse mouth

Do NOT induce vomiting

#### **Precautionary Statements - Storage**

Store locked up

Store in a well-ventilated place. Keep container tightly closed

#### **Precautionary Statements - Disposal**

Dispose of contents/container to an approved waste disposal plant

#### 3. COMPOSITION/INFORMATION ON INGREDIENTS

Components	CAS-No.	Weight %	Trade Secret
Methyl Alcohol 67-56-1	67-56-1	75	*
Sodium Methoxide 124-41-4	124-41-4	25	*

#### 4. FIRST AID MEASURES

First aid measures

Product code: S1531

General Advice: Poison information centers in each State capital city can provide additional

assistance for scheduled poisons (13 1126). Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. First

aider needs to protect himself.

Skin Contact: Wash off immediately with soap and plenty of water. Continue flushing with plenty of water for

at least 15 minutes. Remove all contaminated clothes and shoes. Toxic in contact with skin.

Immediate medical attention is required. Call a physician or Poison Control Centre

immediately.

Eye Contact: Flush eye with water for 15 minutes. Get medical attention. Immediate medical attention is

required. Call a physician immediately.

**Inhalation:** Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration.

WARNING! It may be hazardous to the person providing aid to give mouth-to-mouth

resuscitation when the inhaled or ingested material is toxic, infectious or corrosive. Do not use mouth-to-mouth resuscitation if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper

respiratory medical device. Immediate medical attention is required.

**Ingestion:** Do not induce vomiting without medical advice. Never give anything by mouth to an

unconscious person. Toxic if swallowed. Immediate medical attention is required. Call a

physician or Poison Control Center immediately.

#### Most important symptoms and effects, both acute and delayed

Symptoms

Severe skin and eye irritation or burns. Central nervous system effects. Drowsiness. Dizziness. Headache. Pupilary dilation. Rapid eye movement. Increased sensitivity to light. Visual disturbances. May cause blindness. May cause metabolic acidosis. Dyspnea (Difficulty breathing and shortness of breath). May cause gastrointestinal (digestive) tract burns. Can burn mouth, throat, and stomach. Abdominal pain. Nausea. Vomiting.

#### Indication of any immediate medical attention and special treatment needed

Notes to Physician:

This product contains Methyl Alcohol.

For Methyl Alcohol Ingestion:

- 1. Support vital functions, correct for dehydration and shock, and manage fluid balance.
- 2. The currently recommended medical management of Methanol poisoning includes the following methods:
- a. Emptying the stomach by gastric lavage. It is useful if initiated within < 1 of ingestion.
- b. Correct metabolic acidosis with intravenous administration of sodium bicarbonate, adjusting the administration rate according to repeated and frequent measurement of acid/base status.
- c. Administer ethanol (orally or by IV (intravenously)) or Fomepizole (4-methylpyrazole or Antizol)) therapy by IV (intravenously)as an antidote to inhibit the formation of toxic metabolites. Adjunct therapy with Leucorvin followed by Folate can also be initialized. Please note that if Ethanol therapy is used, monitor blood glucose, especially in children. Ethanol can cause hypoglycemia.
- d. When patients are diagnosed and treated early in the course with the above methods, hemodialysis may be avoided if fomepizole or ethanol therapy is effective, and the metabolic acidosis is corrected, and no renal failure is present. However, once severe acidosis and renal failure occurred, hemodialysis is necessary. Hemodialysis is effective in removing Methyl alcohol and toxic metabolites, and correcting metabolic acidosis

## **Protection of first-aiders**

First-Aid Providers: Avoid exposure to blood or body fluids. Wear gloves and other necessary protective clothing. Dispose of contaminated clothing and equipment as bio-hazardous waste

## 5. FIRE-FIGHTING MEASURES

## **Extinguishing Media**

Carbon dioxide (CO2). Dry chemical. Alcohol-resistant foam. **Suitable Extinguishing Media:** 

Water spray.

**Unsuitable Extinguishing Media:** Do not use a solid (straight) water stream as it may scatter

and spread fire.

Specific hazards arising from the chemical

Carbon monoxide; Carbon dioxide **Hazardous Combustion Products:** 

Specific hazards: Flammable. May be ignited by heat, sparks or flames.

Container explosion may occur under fire conditions or when heated. Vapor may travel considerable distance to source of ignition and flash back. Vapors may form explosive mixtures with air. Most vapors are heavier than air. They will spread along the ground and collect in low or confined areas (sewers, basements, tanks). Fire may produce irritating,

corrosive and/or toxic gases.

Special Protective Actions for Firefighters

Water mist may be used to cool closed containers. For Specific Methods:

larger fires, use water spray or fog. Cool containers with

flooding quantities of water until well after fire is out.

Product name: SODIUM METHOXIDE, 25 PERCENT (W/W) SOLUTION IN **METHANOL** 

#### **Special Protective Equipment for Firefighters:**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear

## **6. ACCIDENTAL RELEASE MEASURES**

## Personal precautions, protective equipment and emergency procedures

Personal Precautions: Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid contact

with skin, eyes and clothing. Use personal protective equipment. Remove all sources of ignition. Pay attention to flashback. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use spark-proof tools and explosion-proof equipment. In case of large spill, water spray or vapor suppressing foam may

be used to reduce vapors, but may not prevent ignition in closed spaces.

**Environmental precautions** Prevent further leakage or spillage if safe to do so. Prevent product from entering

drains. Prevent entry into waterways, sewers, basements or confined areas.

#### Methods and material for containment and cleaning up

Methods for containment Stop leak if you can do it without risk. Absorb spill with inert material (e.g. vermiculite,

dry sand or earth). In case of large spill, dike if needed. Dike far ahead of liquid spill

for later disposal.

Methods for cleaning up

Use appropriate tools to put the spilled material in a suitable chemical waste disposal

container. Use only non-sparking tools. Clean contaminated surface thoroughly.

## 7. HANDLING AND STORAGE

## Precautions for safe handling

#### **Technical Measures/Precautions:**

Provide sufficient air exchange and/or exhaust in work rooms. Remove all sources of ignition. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded. Keep away from incompatible materials.

#### Safe Handling Advice:

Wear personal protective equipment. Use only in well-ventilated areas. Avoid contact with skin, eyes and clothing. Keep away from heat and sources of ignition. Do not breathe vapors or spray mist. Do not ingest. When using do not smoke. Handle in accordance with good industrial hygiene and safety practice.

#### Conditions for safe storage, including any incompatibilities

#### **Technical Measures/Storage Conditions:**

Keep container tightly closed in a dry and well-ventilated place. Store at room temperature in the original container. Keep away from heat and sources of ignition. Store in a segrated and approved area. Store away from incompatible materials.

## **Incompatible Materials:**

Oxidizing agents. Acids. Metals. Alkali Metals. Alkaline Earth metals. Aluminum. Zinc. Acid chlorides. Acid anhydrides. Chlorine. chromium trioxide . Potassium t-butoxide. Chromic anhydride. Beryillium hydride. Acetyl bromide. Phosphorous trioxide. Dichloromethane. Chloroform.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### **Control parameters**

#### **National occupational exposure limits**

Product code: S1531

Product name: SODIUM METHOXIDE,
25 PERCENT (W/W) SOLUTION IN
METHANOL

#### **United States**

Components	OSHA	NIOSH	ACGIH	AIHA WHEEL

## **Appropriate engineering controls**

Engineering measures to reduce exposure: Ensure adequate ventilation. Provide exhaust ventilation or

other engineering controls to keep the airborne

concentrations of vapors and mist below their respective

threshold limit value.

## Individual protection measures, such as personal protective equipment

## **Personal Protective Equipment**

Product code: S1531

**Eye protection:** Goggles. Safety glasses with side-shields.

**Skin and body protection:** Chemical resistant apron. Long sleeved clothing. Gloves.

**Respiratory protection:** Vapor respirator. Be sure to use an approved/certified respirator or equivalent.

**Hygiene measures:** Avoid contact with skin, eyes and clothing. When using, do not eat, drink or smoke.

Wash hands before breaks and immediately after handling the product.

## 10. STABILITY AND REACTIVITY

#### Reactivity

Methanol mixed with diethyl zinc reacts explosively and ignites

Methanol has a violent reaction with alkyl aluminum salts, acetyl bromide, chloroform + sodium hydroxide, chromic anhydride, cyanuric chloride, lead perchlorate, perchloric acid, phosphorus trioxde, nitric acid

Reacts vigorously with oxidizing agents

Phosphorus trioxide and Methanol will react very violently

Acetyl bromide interaction with Methanol is violent and evolves hydrogen bromide

Ignition occurs when Methanol comes in contact with chromium trioxide

**Chemical stability** 

Stability: Stable under recommended storage conditions

Possibility of Hazardous Reactions: Hazardous polymerization does not occur

**Conditions to avoid:** Heat. Ignition sources. Exposure to light. Incompatible materials.

Incompatible Materials: Oxidizing agents. Acids. Metals. Alkali Metals. Alkaline Earth metals. Aluminum. Zinc.

Acid chlorides. Acid anhydrides. Chlorine. chromium trioxide. Potassium t-butoxide. Chromic anhydride. Bervillium hydride. Acetyl bromide. Phosphorous trioxide.

Chronic arinydride. Beryllium nydride. Acetyl bronnide. Priosphorods trioxide

Dichloromethane. Chloroform.

Hazardous decomposition products: Carbon monoxide. Carbon dioxide.

**VALUE-Vapor** = No information available **VALUE - Gas** = No information available

VALUE - Dust/Mist = No information available

**Symptoms** 

**Skin Contact:** Corrosive. Causes severe irritation and burns. Methanol can be absorbed through

the skin, producing systemic effects that include visual disturbances. Absorption

through the skin may cause metabolic acidosis.

**Eye Contact:** Causes serious eye irritation. Causes burns. May cause irreversible eye damage.

**Inhalation**Causes irritation of the respiratory tract with possible burns. Symptoms may include coughing and wheezing. May cause lacrimation. May cause nausea, and headache.

Inhalation of high concentrations of vapors may cause dizziness or suffocation. May cause metabolic acidosis. May cause central nervous system effects, central nervous

system depression.

Ingestion Toxic if swallowed. Ingestion may cause gastrointestinal irritation, nausea, vomiting

and diarrhea. May cause abdominal pain. May cause constipation. May cause headache. May affect respiration (difficult or labored breathing resulting in shortness of breath). May affect behavior/central nervous system/peripheral nervous system (general anesthetic/sedation, malaise, dizziness, vertigo, delirium, confusion, restlessness, giddiness, back pain, headache, muscle weakness, somnolence, lethargy, spastic paralysis, muscle contraction, tremor, ataxia, seizures/convulsions, uconciousness, coma). May affect the cardiovascular system (tachycardia, bradycardia, hypotension, cardiac failure). May cause rapid eye movement. May cause pupilary dilation. May cause significant visual disturbances (reduced reactivity/and or increased sensitivity to light, blurred vision, double vision, snowy vision) and blindess. May cause metabolic acidosis. It may affect the pancreas (pancreatitis). May cause hyperglycemia. May affect liver. May affect urinary system (kidneys). It may affect the brain. May affect the blood (blood coagulation time -

increased prothrombin and partial thromboplastin times). May affect blood (changes in serum composition, leukocytosis). May affect electrolytes. May cause

hypophosphatemia. May cause hypokalemia. May cause hypomagnesemia. May affect the muscles and cause musculoskeletal effects (breakdown of muscle fibers

(rhabdomyolysis), myalgia and joint pain).

Aspiration hazard No information available

Delayed and immediate effects as well as chronic effects from short and long-term exposure

**Chronic Toxicity** Methanol is very slowly eliminated from the body. Because of this slow elimination,

Methanol should be regarded as a cumulative poison. Though a single exposure may cause no effect, daily exposures may result in accumulation of harmful amounts. Prolonged or repeated exposure by inhalation or ingestion will have effects similar to those of acute inhalation or ingestion. Prolonged or repeated inhalation may affect metabolism (weight loss). Prolonged or repeated inhalation may affect the brain. Prolonged or repeated ingestion may affect the liver, and kidneys. Prolonged or repeated inhalation may affect the spleen. Prolonged or repeated inhalation may affect the adrenal gland. Prolonged or repeated skin contact may cause dermatitis

and defatting, dryness, and cracking of the skin.

Sensitization: No information available

Product name: SODIUM METHOXIDE, 25 PERCENT (W/W) SOLUTION IN METHANOL Mutagenic Effects: May affect genetic material

Mutations in microorganisms

Experiments with bacteria and/or yeast have shown mutagenic effects

Carcinogenic effects: Not considered carcinogenic.

Components	ACGIH - Carcinogens	IARC	NTP	OSHA HCS - Carcinogens	Australia - Prohibited Carcinogenic Substances	Australia - Notifiable Carcinogenic Substances

Reproductive toxicity Suspected of damaging fertility or the unborn child

Reproductive Effects: No information available

**Developmental Effects:** Possible risk of harm to the unborn child May cause adverse developmental effects

Teratogenic Effects: May cause birth defects (teratogenic effects)

**Specific Target Organ Toxicity** 

**STOT - single exposure** central nervous system. Eyes.

**STOT - repeated exposure** Causes damage to organs through prolonged or repeated exposure. liver. kidney.

Eyes. central nervous system.

Target Organs: Skin. Central nervous system. Nervous system. Optic nerve. Eyes/vision. Kidneys.

Liver.

## 12. ECOLOGICAL INFORMATION

## **Ecotoxicity**

**Ecotoxicity effects:** Aquatic environment.

Methyl Alcohol - 67-56-1

Product code: S1531

Freshwater Fish Species Data: 13500 - 17600 mg/L LC50 Lepomis macrochirus 96 h flow-through 1

18 - 20 mL/L LC50 Oncorhynchus mykiss 96 h static 1

19500 - 20700 mg/L LC50 Oncorhynchus mykiss 96 h flow-through 1

28200 mg/L LC50 Pimephales promelas 96 h flow-through 1

100 mg/L LC50 Pimephales promelas 96 h static 1

Methyl Alcohol - 67-56-1

Persistence and degradability: Methanol in water is rapidly biodegraded and volatilized. Aquatic hydrolysis,

oxidation, photolysis, adsorption to sediment, and bioconcentration are not significant fate processes. The half-life of methanol in surfact water ranges from 24 hrs. to 168

hrs.

Based on its vapor pressure, methanol exists almost entirely in the vapor phase in the ambient atmosphere. It is degraded by reaction with photochemically produced hydroxyl radicals and has an estimated half-life of 17.8 days. Methanol is physically removed from air by rain due to its solubility. Methanol can react with NO2 in

pollulted to form methyl nitrate.

The half-life of methanol in air ranges from 71 hrs. (3 days) to 713 hrs. (29.7 days)

based on photooxidation half-life in air

Bioaccumulative potential: No information available

**Mobility:** No information available

## 13. DISPOSAL CONSIDERATIONS

## **Disposal Methods**

#### Waste from residues / unused products:

Waste must be disposed of in accordance with Federal, State and Local regulation.

#### Contaminated packaging:

Empty containers should be taken for local recycling, recovery or waste disposal

Safety Data Sheet (SDS) applies only to the material as packaged. If this product is combined with other materials, deteriorates, or becomes contaminated, it may pose hazards not mentioned in this SDS. The physical properties reported in this SDS are obtained from the literature and do not constitute product specifications. Information contained herein does not constitute a warranty, whether expressed or implied, as to the safety, merchantability or fitness of the goods for a particular purpose. Spectrum Chemicals & Laboratory Products, Inc. assumes no responsibility for results obtained or for incidental or consequential damages, including lost profits, arising from the use of these data. No warranty against infringement of any patent, copyright or trademark is made or implied. It shall be the user's responsibility to develop proper methods of handling and personal protection based on the actual conditions of use. While this SDS is based on technical data judged to be reliable, Spectrum assumes no responsibility for the completeness or accuracy of the information contained herein.
